

A Bird's Eye View of a City Grades 2 & 3

New Bedford's historic district and the panoramic view of the city's harbor, as seen from the Museum's observation deck, introduce students to geographic ways to describe a place.

Learning standards will be met as students:

- Observe historic buildings and sites
- Gather geographic data to make a map
- Increase their understanding of the interdependent relationship between location and place
- Compare and contrast New Bedford's geographic features to those of their own community

ALL PROGRAMS CORRESPOND TO THE MASSACHUSETTS DEPARTMENT OF EDUCATION CURRICULUM FRAMEWORKS.

For pre- and post-visit activities see *A Bird's Eye View of New Bedford*, part of the Museum's "Extend the Classroom Experience" series.
