

How to Create Your Own Logbook Stamp:

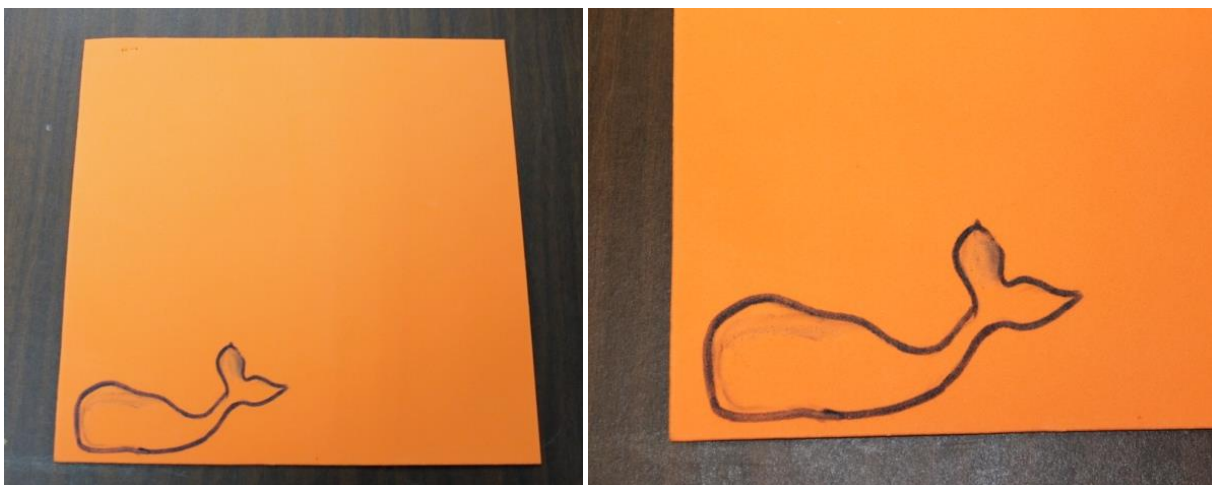

Supplies:

- 1 Piece of Foam
- 1 Piece of Cardboard (or other firm material)
- Magic Markers
- Glue
- Logbook to stamp in (click [here](#) to find instructions to make the logbook shown below)

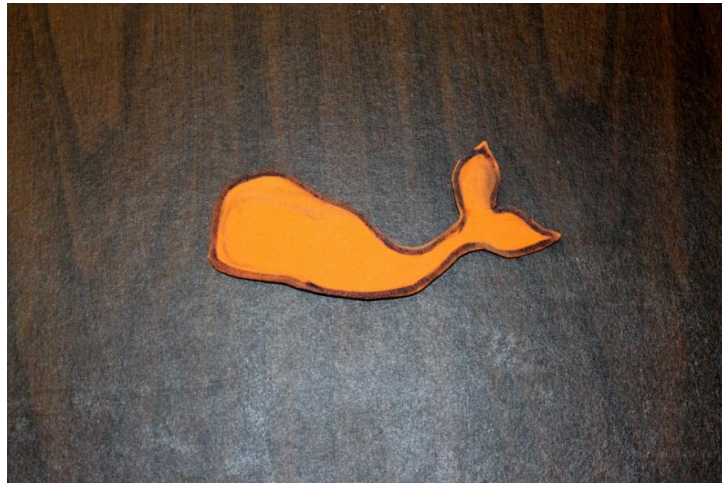

Directions:

1. Draw the shape of a whale on to the foam in magic marker or pencil.

2. Cut along the outline of your whale with scissors.

3. Place your whale on the cardboard to determine the size of the base. The cardboard should be a rectangle, slightly larger than the widest and tallest parts of the whale.

4. Coat the whale with a thin layer of glue.

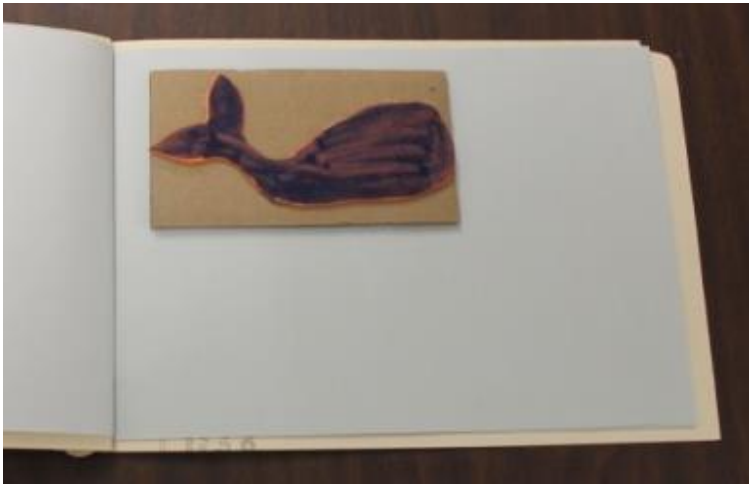

5. Firmly press the whale to the cardboard and let dry.

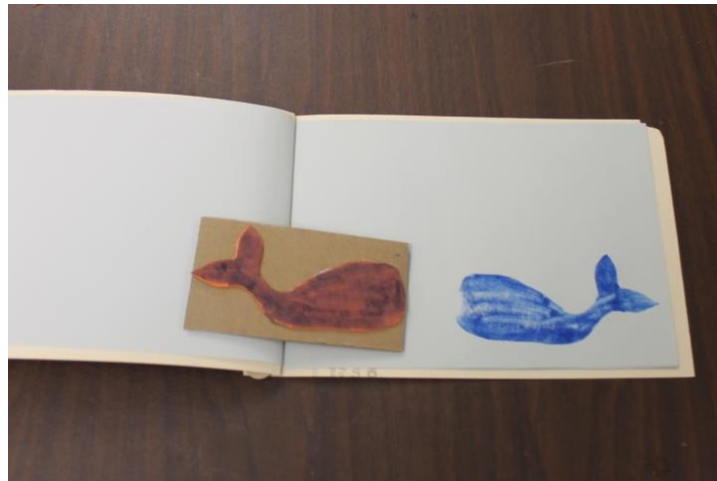

6. Take a magic marker and coat the foam whale with ink.

7. Place the stamp ink side down in your logbook, then press firmly, making sure to apply pressure to all areas of the stamp.

8. Remove the stamp from the page, and admire your very own logbook stamp!

9. Experiment with different colors and patterns of magic marker on the stamp.
