

WHALES GIANTS OF THE OCEAN

Lesson 5 Create a Critter

Think About It

After you have designed your imaginary critter answer the following questions:

1. Where would your imaginary critter be best suited to live? (in a hot or a wet climate? in a mountain area?)

2. Explain what structures would allow your critter to adapt to and survive the conditions in that habitat or in that particular climate.

3. What special structures do animals need to have if they live in the ocean? List at least structures and say how each helps it live in the ocean.
