

WHALES GIANTS OF THE OCEAN

Lesson 8.2 - Echolocation: Where's That Sound? Echolocation Bar Graph Worksheet

Number of times the “front” guess was correct: _____
Number of times the “side” guess was correct: _____
Number of times the “behind” guess was correct: _____

Count the greatest number of correct answers for any one category. Number the axis up to that number. Color in the bar graph below with the number of times each guess was correct. If the answer is 0, leave that group blank.

Which location had the highest number of correct guesses? (If it was a tie, you can write both locations).

Which location had the lowest number of correct guesses?

What are your ideas about why some locations were easier or harder to guess?
